To access the live and archived webcast from the Cantor Global Healthcare Conference, please visit the Events & Presentations page in the "Investors & Media" section of the Company's website. A replay will remain available for 30 days following the event.

About ARS Pharmaceuticals, Inc.

ARS Pharma is a biopharmaceutical company developing and commercializing treatments that help at-risk patients and their caregivers treat and prevent severe allergic reactions. The company is commercializing **neffy**[®] (epinephrine nasal spray), the only needle-free epinephrine approved by the U.S. Food & Drug Administration and European Medicines Agency, for the emergency treatment of Type I allergic reactions, including anaphylaxis, in adults and children weighing 33 lbs. (15kg) or more. The product is marketed as **EURneffy**[®] in the European Union and as 优敏速[®] in China. Leveraging its intranasal technology, ARS Pharma is also developing ARS-2, currently in a Phase 2b clinical trial, as a potential first treatment for acute flares of chronic spontaneous urticaria (CSU).
